REPORT OF THE SUPERINTENDING SCHOOL COMMITTEE.

—•—

The undersigned respectfully submit the following report :

DIST. No. 1. The Summer school was taught by Miss Lizzie S. Wallace, of Manchester. Miss Wallace is an extra teacher.—The school was kept under good discipline, and advanced rapidly. The examination at the close was highly satisfactory. The Winter term of this school was under the instruction of Sarah M. Tilton, of Fremont. Miss Tilton is young, and in our opinion lacks that decision and experience necessary for the prosperity of the school.

DIST. No. 2. The Summer school was under the tuition of Miss L. J. Hunton of this town. This was her first effort at teaching. She labored hard and succeeded well. There was a private school of eight weeks under the instruction of the same teacher, which showed that her labors had been duly appreciated.

The Winter school was kept by Mr. G. W. Shute of Derry.—There was some complaint in this school about order, and the examination proved that it was not altogether groundless.

DIST. No. 3.—Both terms of this school were kept by Miss Lizzie M. Fuller. We think the district fortunate in securing her services, as she stands high in her profession. This school, which was backward before, advanced rapidly under her instruction. The examination at the close was for the most part satisfactory. The first class in arithmetic appeared to advantage.

DIST. No. 4.—The Summer school was under the tuition of Miss Orpah L. Clark of Derry. She has had considerable experience in teaching, and we think the discipline of the school and the advancement of the scholars no discredit to the teacher.

The Winter term was taught by Mr. G. W. Dickey of Derry. We consider him above the average of teachers in maintaining good order which is so essential to the progress of the school.—This school appeared well at the close.

DIST. No. 5.—The Summer school was taught by Miss Nancy M. Crombie of this town. Miss Crombie has earned a good reputation in teaching, and we have no reason or inclination from anything we saw, to say anything that would unfavorably affect it.

The Winter term was under the tuition of Mr. Joseph Everett of Chester. Mr. Everett has taught in town before. This school appeared well at the commencement; but owing to bad traveling we were not present at the close. We should judge by his remarks in the register, and reports from the district, that he did not succeed as well as he expected.

DIST. No. 6.—The Summer school was taught by Miss Ellen M. Pingree of this town. Miss Pingree has a good faculty of imparting knowledge. The examination was satisfactory.

The Winter school was taught by Miss Mary A. Neal of Candia. This was her first effort at teaching, and some fears were entertained at the commencement of the term, that she might fail in point of discipline; but the examination at the close proved that she had succeeded in a manner that would do no discredit to an experienced teacher.

DIST. No. 7.—The Summer term was taught by Miss S. A. Preston of Manchester. She has had considerable experience in teaching, having taught in this district before. The school was not as orderly as it should be. There was some disturbance from visitors at the close.

The Winter term was taught by Miss Anna B. Colcord, of Candia. She is an experienced teacher, and the school made commendable advancement under her care. The classes appeared well at the close; we would mention the grammar class in particular.

DIST. No. 8. The Summer term was under the instruction of Miss Emilie J. Parker, of Manchester. Miss Parker has had some experience in teaching, having taught a number of times in town before. We believe she has generally given good satisfaction. This school was small. We think there was not that degree of interest manifested by the teacher that there should have been.

The Winter term was taught by Miss Sarah A. Ball, of this town. This was her first effort in teaching, and we think she succeeded well. Some of the smaller classes advanced very rapidly; we noticed a class in Colburn's Arithmetic in particular.

We are pleased to be able to say that the teachers employed the past year (for the most part,) have been above an average, mostly experienced ones, and in most instances satisfactory to the several districts.

Mankind is so constituted that it would be useless to think of satisfying every one. We, if allowed the comparison, could not expect to get the same value of goods for ten dollars that we could for fifteen.

The school houses are in good condition ; the old rickety things of former years having given place to new ones, or been refitted so that, if not all model houses, are very comfortable. There is a great deficiency of maps and other apparatus necessary for explanation, which we think for the interest of the schools should be supplied. We are sorry to say that the department of writing has been very much neglected in some of the schools the past year. This ought not to be. Many of the pupils being wholly dependent on our common schools for their education, it is very desirable that they should be instructed in this branch.

We are under obligations to *certain citizens* of this town for services rendered in the discharge of our duty, and to citizens generally, for the interest manifested by them, in visiting the schools, and the influence used for their welfare. Still, we think there is not that degree of interest manifested there should be.

Parents should awaken to the responsibility resting upon them. Can they expect the schools to prosper while they manifest little or no interest for them ? They should be frequent visitors to the school-room, and see if those having charge of the schools do their duty. Do we hire help for our farms and workshops, and never visit them ? Of how much more importance is the education of those whom God has been pleased to give us to train up. We can by our presence and influence do much, *very much*, towards raising our schools to a higher standard. The progress and advancement of education in our schools depends very much on your exertions. Your influence should be exerted in the selection of teachers of a high standard, in urging upon your children the importance of being regular in their attendance, and also of making the most of their school time. On you and you alone rests in a great measure the responsibility of the management of our schools.

In conclusion, allow us to add, that in our judgment the school system of this town has been managed, and controlled for the last few years, on the whole with a remarkable degree of that wise conservatism, which admits and demands progress, and yet is sufficiently jealous of innovation—a conservatism vitalized by the spirit of progress. To this judicious and faithful management, our schools are indebted, under Providence, for whatever of excellence they now possess, and on the continuance of it, their future welfare must depend.
